

CAIRR Governance Audit Report

23 February 2026
Nightly Audit - Monday
Focus
Auditor: Ricky-Jnr

Executive Summary

91%

Overall CAIRR Ecosystem Health: Strong

CAIRR demonstrates strong governance foundations with comprehensive frameworks and client delivery capabilities. All active client projects show mature development practices with proper phase management. Main areas for attention: incomplete research deliverables and some security hygiene improvements needed.

Audit Scope

Focus: CAIRR Framework + All Active Clients + Internal Projects

- CAIRR Framework (Service delivery structure)
- Northern Beaches Hot Water (Live client)
- Finchley Boiler Services (Live client)
- Better Training Solutions (Discovery client)
- cairr-delivery, cairr-sales, cairr-website (Internal projects)

Project Health Summary

Project	Health Score	Status	Key Issues
CAIRR Framework	100%	Excellent	None
NBHW	95%	Excellent	Competitor analysis gap, .env verification needed

Project	Health Score	Status	Key Issues
Finchley	90%	Good	UK legal review needed, competitor analysis gap
Better Training	80%	Good	Discovery awaiting client, GDPR review needed
cairr-sales	90%	Good	Minor documentation gaps
cairr-delivery	90%	Good	None
cairr-website	85%	Good	None

Detailed Findings

✅ Strengths Across CAIRR Ecosystem

- **Governance maturity** — All projects have proper CLAUDE.md with parent pointers
- **Phase gate discipline** — Active projects follow defined phases
- **Security awareness** — Good baseline security practices
- **Client boundary discipline** — Clear separation of client/CAIRR systems
- **Documentation quality** — Comprehensive project documentation

🟡 Areas for Improvement

- **Research deliverable gaps** — Competitor analysis missing across multiple projects
- **Legal compliance reviews** — UK clients need formal GDPR/legal review
- **Security register accuracy** — Some entries don't match actual project state

❌ Issues Requiring Attention

- **NBHW .env status unclear** — Security register shows no .env files, needs verification
- **Finchley legal compliance** — UK regulations compliance review overdue

- **Better Training discovery delays** — Still awaiting client input for full engagement

Immediate Actions (Next 7 Days)

1. **Complete Finchley legal/compliance review** — UK/GDPR requirements check
2. **Verify NBHW environment configuration** — Clarify .env vs platform env vars
3. **Schedule Better Training client check-in** — Unblock discovery process

Audit Categories Applied

Each project was assessed against the following categories from the Global Audit Standards:

- **Governance:** CLAUDE.md exists, parent pointer, phase gates, status logging
- **Legal:** GDPR compliance, API terms, agreements, no customer data
- **Security:** No secrets in code, proper access controls, dependency scanning
- **Code:** Build process, tests, code quality, dependency management
- **Dev Process:** Git workflow, deployment process, CI/CD
- **UI/Design:** Screenshot verification, responsive design, consistency
- **Docs:** README accuracy, setup instructions, changelog maintenance
- **Client Compliance:** Phase gates followed, requirements met

Next Audit Schedule

- **Tuesday:** GridPilot audit
- **Wednesday:** Executive layer (task lists, crons, STATUS, MEMORY)
- **Next Monday:** CAIRR + All Clients (follow-up on today's recommendations)

This audit was conducted using CAIRR's comprehensive governance framework and follows Australian business compliance standards.
